The following list of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

1-21. (Canceled)

- 22. (Original) A method of administering an active therapeutic agent to an airway surface of a subject in need thereof, comprising administering the active agent in an effective therapeutic amount in a vehicle, which vehicle comprises an osmotically active compound, the osmotically active compound included in an amount effective to increase the volume of liquid on the airway surface.
- 23. (Original) A method according to Claim 22, wherein the active agent is selected from the group consisting of antibiotics, antiviral agents, bronchodilators, iontransport modulators, enzymes, expectorants, viral gene transfer vectors, anti-inflammatory agents, hormones, antihistamines, anti-neoplastic agents, and anti-*Pneumocystis pneumonia* agents.
- 24. (Original) A method according to Claim 23, wherein the active agent is a sodium channel blocker.

25-30. (Canceled)

- 31. (Previously Presented) The method according to Claim 22, wherein the osmotically active compound is an ionic osmolyte.
- 32. (Previously Presented) The method according to Claim 31, wherein the ionic osmolyte is a salt.

33-36 (Canceled)

37. (Previously Presented) The method according to Claim 32, wherein the salt is selected from the group consisting of choline chloride, choline iodide, lithium chloride,

meglumine chloride, L-lysine chloride, D-lysine chloride, ammonium chloride, potassium sulfate, potassium nitrate, potassium gluconate, potassium iodide, ferric chloride, ferrous chloride, and potassium bromide.

38-43. (Canceled)

44. (Previously Presented) The method according to Claim 22, wherein the subject is afflicted with cystic fibrosis.

45-48. (Canceled)

49. (Previously Presented) The method according to Claim 22, wherein said administering step is an aerosol inhalation administering step.

50. (Canceled)

- 51. (Previously Presented) A method of administering a sodium channel blocker to an airway surface of a subject in need thereof, comprising administering the sodium channel blocker in an effective therapeutic amount in a vehicle, said vehicle comprising potassium sulfate as an ionic osmolyte, said potassium sulfate included in an amount effective to increase the volume of liquid on the airway surface.
- 52. (Previously Presented) The method according to Claim 51, wherein said subject is afflicted with cystic fibrosis.
- 53. (Previously Presented) The method according to Claim 51, wherein said administering step is an aerosol inhalation administering step.
